Subject: Letter of Recommendation

Six years ago we were looking out for solutions that would make us future ready. We finally zeroed down to implementation of EDI solutions. This was critical as we had planned to implement it across our supply chain partners.

The decision of moving ahead with the solutions provided by Tangentia India technologies Pvt Ltd was a great success as Tangentia paid at most attention to the details and provided us a solution as per our business requirement. The knowledge and expertise of the team to deliver on time was very much commendable.

We value our relationship with Tangentia. They've proven themselves to be capable and willing partners in numerous development projects, and their ability to code in many environments gives us the confidence that we'll be able to handle any new business opportunities that come our way.

We've been working together with Tangentia India Technologies Pvt Ltd for more than 6 years now and it is has been a very positive experience for us.

I would recommend Tangentia without hesitation.

Yours faithfully,

Suresh P.
